Tattoo colors

The fel energy that is imbued into the demon hunter's body is held in check by two things: **Willpower** and the **Arcane Tattoos** emblazoned into their flesh. Each ritual to become a demon hunter is different and likewise, no two sets of tattoos are quite the same.

VENGEANCE METAMORPHOSIS

Assuming either form of the Metamorphosis is a very dangerous feat for the demon hunter to undertake. Each time, the demon hunter is unleashing the demon within, and each time she runs the risk that the demonic power will take over. At that point, all semblance of the elf that was will be lost and only a demonic servant of the **Burning Legion** will remain.
